

Jan Mondrup Pedersen

European Patent Attorney, Partner

Head of SPC Filing & Prosecution, MSc, PhD Chemistry

Jan has technical expertise within the areas of chemistry and biotechnology, including particularly pharmaceuticals, diagnostics, organic synthesis and modified surfaces. Jan has worked with patents within these areas in collaboration with international pharmaceutical companies, biotech companies, universities and hospitals.

He is experienced in patentability assessments, freedom-to-operate analyses (FTO), patent surveillances, due diligence analyses, and in drafting and prosecution of patent applications. Finally, Jan has specialised in the filing and prosecution of Supplementary Protection Certificate (SPC) applications in Europe and Denmark in particular.

Jan is the author or co-author of 13 research papers in renowned international chemistry journals, and has performed studies of i.a. the synthesis and modifications of heterocyclic anti-cancer compounds and peptides implicated in for example antibacterial activity, Alzheimer's disease and diabetes.

He has successfully completed the CEIPI Course on Patent Litigation in Europe at the University of Strasbourg, and he will therefore receive the European Patent Litigation Certificate under the Unified Patent Court when it enters into force.

Jan Mondrup Pedersen works with IPR within the following industries:

- > Chemistry
- > Pharma
- > Biotechnology
- > Nanotechnology
- > Cleantech
- > Oil and Gas
- > Medical technology
- > Health care
